

Finnish institute for health and welfare recommends using a face mask where it is not always possible to keep a distance

How you can reduce the spread of Covid-19

Every passenger can improve the safety on board. Please follow these instructions:

- Wear a face mask
- Only travel if you are healthy
- Cough into a tissue or your sleeve
- Remember to wash your hands
- Keep your distance if possible
- Do not unnecessarily touch surfaces

How we are taking care during Covid-19

We have made changes in our procedures and the passenger spaces on board in order to reduce the risk of contamination. Our boats have hand washing facilities and hand desinfectant. We do not book to full passenger capacity. Of course we can not guarantee 100% safety from the virus but together we can reduce the risk.

Have a safe journey!
